

CREST NAME BADGE

Supply all artwork files in vectorized PDF file format. Printing is always in CMYK + special colors (White, Clear/lacquer). When using a colored name badge plate, a base white is added when necessary to replicate the correct printing color. It is impossible to print to the slanted edge of the badge, respecting the print area dimension.

Very important! For hairline print (less than 0.02" or 0.5mm), a bit wider clear lacquer is necessary to hold the print on the surface of the badge.
