# ELEMENTS

Elements Name Badge is printed directly on the surface of a metal badge. The print is always in full-color (CMYK + White) and a base white layer is included if the badge is in a color other than silver. For the silver badge, there is no need for a base white layer. White can also be printed on top of the print.

Please supply your artwork by creating a single badge layout file with the logo and a single name to be printed. Send a separate list of names for personalization during printing. If you use a specific typeface, include the necessary font files as well.

We can also do the design of your badge for you.

The Badge
2.67" x 0.62"
68 x 15,85 mm

Printable area:
