

Custom Socks with Logo

This is just a rough preview of how a design behaves on a woven sock. See the comparison file on our artwork instructions for a detailed view of how weaving changes a digital design. Weaving cannot reproduce digital design without losing some of the finest detail. Small details are always lost, and some patterns might change. The easiest way to get into the order process is to send your graphics, logos, and color requests separately and let us do the proof.

Important! The sock pair is identical; this view is only a preview of a single sock from different sides.

Parts that stretch the most are parts that you should avoid putting any graphics on instead of using a single color.
